PROFILE

Highly motivated Artificial Intelligence student and current intern, with strong skills in programming, data structures, algorithms, and data science, eager to contribute to impactful projects and continue learning from real-world industry experience.

EDUCATION

Amrita Vishwa Vidyapeetham

B.Tech in Artificial Intelligence

CGPA: 8.22/10

2021 – Expected 2025 | Bengaluru

SKILLS

Programming Languages: Python | C++

Frameworks/Libraries: Scikit-Learn | LangChain | Keras & Tensorflow | ReactJS | ExpressJS | NodeJS

Databases: MongoDB | MySQL | AWS S3

Developer Tools: Git/Github | Google Colab | VS Code | Cursor | Jupyter Notebook | Kaggle

PROFESSIONAL EXPERIENCE

SG Analytics

Data Scientist Intern

2025 Jan – 2025 Jul | Pune

- Developed a smart web crawler and data pipeline using Python, Scrapy, FastAPI, and AWS S3, automating the extraction of 500+ URLs/minute with 95% accuracy and presenting results via an interactive Streamlit dashboard.
- Automated an SFDR-compliant CIM system to extract ESG data and KPIs from unstructured corporate documents, generating structured Excel reports to streamline financial analysis and reporting.
- Designed an intelligent SWOT Analysis System using Streamlit, RAG, and **Amazon Bedrock** , integrating SEC 10-K and annual reports with web data to produce factually accurate, auto-generated reports.
- Implemented a secure document Q&A platform using **OpenWebUI**  and Amazon Bedrock, enabling private, context-aware interactions with internal documents without external data exposure.

PROJECTS

AI Interviewer

- Developed a MERN stack AI chatbot generating 50+ realistic interview Q&As per session using **Ollama** locally.
- Built scalable React-Node architecture handling 200+ concurrent users with <2s response time.
- Improved user interview readiness by 30% based on post-session feedback.

Secure Face Login System - Full Stack Deep Learning Web Application

- Developed a full-stack app with React, MongoDB, SQL, and CNN-based face recognition, achieving 98%+ accuracy and reducing login time by 40%.
- Designed a responsive, intuitive UI that led to 95%+ user satisfaction and a 60% increase in daily active users.
- Optimized backend & DL model performance, ensuring <1.5s response time & support for 300+ concurrent sessions.

Code Review Assistant

- Built a Code Review tool using LangChain, automating analysis with indexing & reducing manual review time by 70%.
- Used text splitters to segment large codebases (1000+ LOC), enabling 4× faster reviews and 90%+ accurate feedback.
- Implemented code output parsing to deliver real-time, actionable suggestions, improving developer efficiency by 50%.

CERTIFICATIONS

- Responsive Web Development (Free Code Camp) 
- Python, OOPs (Infosys Springboard)
- MySQL Basics (Great Learning) 
- Data Structures and MySQL (Great Learning)

PUBLICATIONS

C to Python Compiler using LEX & YACC

ICOFE - 2024

2024 Oct

OTHER ACTIVITIES

Amazon ML Challenge 2024 - Hackathon Participant — Participated in a national-level machine learning competition, solving real-world challenges using advanced ML techniques. | **Volunteer** — Volunteered as a mentor for an event in our Institution, helping students develop foundational skills in coding and web development.
